Taskbar > Taskbar textures

Move the textures to: “C:\Program Files (x86)\Stardock\Start11\TaskbarTextures”

1) Apply a custom texture to the taskbar

2) Use a custom taskbar background texture > On
3) Choose the texture
4) Pick color... > choose color for left side of taskbar
5) Adjust texture transparency > adjust to your liking
6) The texture should be positioned > Force to stretch to fit

Taskbar

How should the taskbar background look?

7) Give the taskbar rounded corners > On
8) To fine tune the taskbar transparency:
   Adjust taskbar transparency > adjust to your liking

Advanced rounded taskbar settings

9) Set to: Slightly more rounded
10) X offset: XX Large (to match the center gap)
    Y offset: to your liking
